

CCRP CERTIFICATION EXAMINATION ETHICS STATEMENT

Affirmation: By signing this form, I accept the conditions set forth in the Examination Notice and the Certification Examination Policies and Procedures. I certify that the information provided in the certification application and this form is true, correct and complete to the best of my knowledge. I understand that if any information is later found to be false, the Certification Committee reserves the right to revoke any certification that has been previously granted.

I will not copy or retain examination questions in any form. I will not exchange information about the content of the examination with anyone else. Any medical records included with this examination are created strictly for the purpose of this exam, but will be treated with the confidentiality required for any medical records.

SOCRA Certification Program Code of Ethics

As a clinical research professional, I recognize and affirm my responsibility to abide by the following basic ethical principles inherent in clinical research:

1. I will respect the human dignity of research participants with regard to self-determination and full disclosure of information throughout the research process.
2. I believe that research participants should be free from harm and exploitation in accordance with the risks and benefits of the research project.
3. I believe that research participants should have the right to receive fair and confidential treatment during the selection process and throughout the research project.
4. Additionally, I will be accountable for adhering to the standards for scientific integrity recognized around the world. This mandates honest, truthful behavior on behalf of myself and others with whom I deal while engaged in clinical research. I recognize my right and responsibility as a clinical research professional to question suspected falsified data, and if necessary, proceed with appropriate reporting procedures as mandated by the regulatory agencies.
